

New England has some of the highest energy costs in the country, mainly due to the region's heavy reliance on fossil fuel sources. Additionally, there is an increasing level of knowledge about the harmful effects the pollutants from fossil fuels have on the global environment. Come learn what your community can do to combat these issues.

## Presentations

**Clean Air-Cool Planet:** Based in Portsmouth NH, CA-CP works with municipalities, businesses, and schools to reduce their impacts on global climate change. Learn how to form an energy committee, inventory greenhouse gas emissions, and what CA-CP can do to assist your community's energy issues. [www.cleanair-coolplanet.org](http://www.cleanair-coolplanet.org).

**City of Portsmouth:** The Portsmouth Library is scheduled to be the first public building in NH to receive Leadership in Energy and Environmental Design (LEED) certification from the U.S. Green Building Council. Learn more about this LEED project, wastewater treatment options, and their BioDiesel pilot program.

**Town of Epping:** Epping is one of the state's leading municipalities in implementing strategies to control energy costs. Learn about their energy efficiency ordinance, energy assessment tools, and partnerships they've utilized to control energy costs.
